HALO 3

The online mode is obviously where players will get the most out of *Halo 3*, but if you dig deeper into the Campaign mode, you'll find that it offers a lot more than just a single-player story. It's actually designed to be played multiple times in various ways that can be determined by the player. In addition to the customary four difficulty settings—Easy, Normal, Heroic and Legendary—the game has a new Campaign Scoring option which offers a remarkably different play experience. In fact, Bungie recommends that you play with this option off (default setting) when you first play through the story, so you can become familiar with the levels before taking on the challenge. The Campaign Scoring mode is further enhanced by the use of Skull cheats that can handicap the player in various ways. However, these Skulls need to be discovered in hidden areas throughout the game before they will appear as an option. We'll take you through the regular Campaign mode and later show you where all the Skulls can be found (we suggest you hunt for Skulls the second time through).

CAMPAIGN MODE

LEVEL 1—SIERRA 117

The game throws you right into the heat of battle with a generous dose of Brutes and Grunts (you'll be seeing a lot of these guys). Note that the Grunts tend to panic when the big Brutes are defeated, so use that to your advantage.

As you forge ahead through the jungle, watch for snipers high in the rocks and trees. When you reach the major stronghold, avoid jumping down the cliff and straight into battle; follow the Arbiter down the right path and sneak up on the enemy.

After you clear out the area, you'll find Johnson and his team imprisoned behind a shield barrier in one of the structures. Phantoms will soon come inbound. Hold your position around the bridge area until the Pelican comes to the rescue.

LEVEL 2—CROW'S NEST

At the UNSC base, head downstairs and follow the marine to the door; you will receive an Assault Rifle. As you make your way to the hangar, use the stationary shields as cover (you can shoot through the slits). When you reach the hangar, rip the gun turret off its stand and use it to shoot off the Phantom's guns. On your way back to the ops-center, you will receive orders to clear out the barracks—a new waypoint marker will appear on your sensor. When the Drones come attacking from the air, use the turret on top the rock to make quick work of them.

Back at the ops-center, follow Johnson to the door; a rough battle against Brutes lies ahead. Explosives and shields will help tremendously here and you'll probably have to retrieve some weapons from dead enemies. The Brute Chieftain—a.k.a. "Hammer Guy"—will eventually come charging. Get ready to jump out of his way or you'll be killed in one blow. Exit the door to the right (behind the enemy shields) and jump down the shaft.

After fighting off some Drones, meet the Arbiter and keep pushing ahead. The battle in the barracks can get pretty intense, so make sure the Arbiter stays by your side for support. Get to the landing zone and clear out the Brutes so the Pelican can touch down.

After arming the bomb in the ops-center, go downstairs and enter the elevator. The lights will lose some power, so you'll need to turn on your flashlight. You'll find a large arsenal of weapons downstairs to prepare you for another fight in the hangar. Get past the hangar and out to the elevator to end the level.

LEVEL 3—BSAVO HIGHWAY

Turn on your flashlight and lead the team into the garage. You can choose to drive the Warthog or man the turret. Driving is the best option, as the A.I. gunner is pretty accurate and dependable. You can help by running over enemies as you drive.

When you reach the blue barrier, you will not be able to pass with a vehicle, so get off, go inside and shoot the mechanism to let everyone pass (Drones will fly out of the tunnel). The Warthog ride will end at the broken bridge. Brutes will be carrying plasma cannons further down, so look out for some cover.

The Wraith is the first formidable

enemy vehicle in the game. Use a turret, Brute Shot and explosives to bring it down. Another Warthog will be deployed for you by a Pelican. Further down you'll find some Choppers that you can drive as well. Since the Brutes like to use their Choppers to ram your vehicle, make sure your Warthog partner sticks with you for extra fire support.

Two more Wraiths will be up ahead. The easiest way to take them down is to target the gunner first before taking out the driver inside. Try to smash through the rest of the level with a vehicle if you can. Disengage the shield at the end and a cutscene will play.

LEVEL 4—THE STORM

Enter the facility with the team. Head up the upper walkway and hit the switch so the Warthogs can pass through. Hop on a Ghost and destroy the Wraith outside. The red Wraith is the anti-air version which you must destroy per orders. Go inside the door on the other side; beware of the Drone attack overhead. A Mongoose squad will be waiting for you on the other side. Neutralize all the Wraiths, Ghosts and Choppers on the lake bed.

Fighting the giant Scarab boss will be a team effort.

Keep driving the Mongoose under the scarab so your gunner can aim at the leg joints. You'll notice that the other squad members will start focusing their fire on the same area. Whatever you do, stay away from the front side of the Scarab and its laser cannon. When one of the legs takes enough damage, the alarm will go off and the Scarab will lower itself to the ground. Quickly get to the backside, jump out of the

Mongoose and onto

the Scarab's inner platform. Clear out the enemies inside and head to the red-lit cockpit area. Destroy the shield and the mechanism behind it. Get off the Scarab and run away before it blows!

The massive Hunters will require a bit of firepower to take them down—stay with your team so they can provide support fire. As you battle your way up the hill to the massive anti-air cannon, use the Plasma Turret to make the fight easier. Be sure to flank around the enemy rather than fight them head-on. Notice that the bottom of the cannon will open up right before each shot. Shoot the white core section when it is exposed and you're good to go!

LEVEL 5—FLOODGATE

This is a pretty straightforward level—just keep pushing ahead with the Arbiter at your side and eliminate the oncoming Flood enemies. Since the Flood tend to stick together in bunches, the shotgun and explosives are particularly effective against them. The tiny spores may seem harmless and inconsequential compared to the two-legged monsters, but they can transform any organism (including corpses) into more Flood enemies. The Flood is like a plague that keeps spreading—exterminate them all! More Elites will join you later on. Dead Elites can turn into Floods as well, so try to keep them alive.

LEVEL 6—THE ARK

You will have the Sniper Rifle equipped at the start of this level. Clear out the pockets of enemies as you make your way through the canyon. Hunters will be deployed later by an incoming Phantom. You may need to scrounge around for more firepower, since the rifle is only mildly effective against them.

Outside of the cave, you'll find a couple of Mongooses parked near some enemies. Don't hop onto the vehicles right away—a second wave of Brutes will appear on Choppers. Hop onto the Prowler and finish them off with the giant turret. More Choppers and Ghosts will appear as you drive through the canyon. Once you've defeated everyone at the stronghold, Johnson will instruct you to follow his Pelican into the next area.

Even on a vehicle, the next area can get pretty rough, especially against the blue Wraith. You may need to ditch your squad and get on a Ghost; that way you can control both the driving and the firing. Compared to the pesky blue Wraith, the anti-air Wraiths should be a breeze (since they mostly shoot skyward).

Use the same technique as before for the second Scarab. This time, though, you'll have the luxury of hopping onto a Scorpion and disabling the leg joints with just a few shots. After you take down the Scarab, head up the ramp and meet the Arbiter. Once you've activated the Cartographer, let the Arbiter take care of the aerial assault and follow Monitor. Enemies are going to start cloaking here, so keep your eyes out for any ripples in the air. The final area has another Hammer Guy, along with a host of snipers.

LEVEL 7—THE COVENANT

You'll start with a Fuel Rod Gun, but don't waste it on the Brutes—save it for the Wraith up ahead. Once the Wraith is eliminated, drive the Warthog. The Tower is heavily protected inside and out. If your shield is getting low, drive away from the heat of the battle and recharge.

Up the elevator, you'll find a pack of Brutes and Hammer Guy protecting the barrier switch. The Hammer Guy will come charging once all the Brutes are dead.

When piloting the Hornet, you'll need to destroy both air- and land-based targets to survive.

It'll be easier if you disable the anti-aircraft guns first before engaging the Banshees. Clear out a landing area near the third tower for the allied team. The configuration in the tower is the same as the first, except the Brutes will be cloaked near the barrier switch. Chaos will erupt once the barrier is lowered. Fight through the Flood and the Arbiter will be waiting for you downstairs. Back outside, the Arbiter will take off on a ship. Head to the right and you will have a choice between three different vehicles.

As you push through mountain pass, Hornets will land and give you another vehicle option before the double Scarab battle. Now that you know how to take them down, have some fun and try different tactics. After entering Truth's complex, there will be a few twists to the story, so we'll let you enjoy it without any spoilers!

LEVEL 8—CORTANA

By and large, this is the most hated level by *Halo 3* players. The endlessly spawning Flood definitely make it frustrating. There's a flamethrower up ahead in the blue corridor area (where Cortana says "Don't look at me! Don't listen!"), but it will just slow you down. The best way through this section is to make a mad dash all the way to the end, while using an Energy Sword to slice anything that gets in your way. Use Cloak in cramped areas if you have it.

After rescuing Cortana, you'll need to destroy the central reactor. This will be easier to do if you clear the area out first. Of course, more Flood will show up after all three cores are destroyed. Again, it's a mad dash like before—don't get caught up in Flood extermination. Watch for blasted doors and other new openings as you beeline to the exit. Thankfully, the Arbiter will be waiting for you with a Flamethrower near the end.

LEVEL 9—HALO

When the Flood arrives, make sure the Arbiter stays close or you'll have little chance of surviving. Checkpoints will be determined by the number of enemies killed, so keep at it. Once you reach the top, you will need to hold your position and keep fighting until Monitor opens the door. Once you're inside, Monitor will go haywire. Avoid its lasers and eventually Johnson will fire and drop his laser gun. Grab the gun and finish off Monitor.

The final part is a mad dash on the Warthog—probably the coolest part of the game!

ALL 13 SKULL LOCATIONS

Skulls activate cheats within the Campaign mode, but they first have to be found within the game before you can access them. They're not "cheats" in the regular sense of the word, since they do not make the game easier. In fact, they make the game harder by hindering the player in various ways (except the humorous Grunt Birthday Party Skull). They're meant to give you an added challenge as you become more adept at the game.

Skulls can be viewed in the Campaign menu in the Edit Campaign Options setting (where you can also set Campaign Scoring). Each Skull effect can be toggled on or off at this screen.

Before you start hunting for Skulls, here are some important things you should know:

- There are no Skulls to be found in Easy mode. You must play at the Normal difficulty setting or higher.
- You must start at the beginning of each level (Mission Start). The Skulls will not appear if you start at a Rally Point. You can still use the "Resume Solo Game" and "Revert to last save" options, though.
- All you have to do is pick up a skull (by pressing RB) for the game to recognize that you've found it. You can even save and quit immediately after that if you wish.
- Finding a Silver Skull does not give you an "Achievement Unlocked" message.
- The Hayabusa Armor will become unlocked once you find all 13 Skulls.

The following Skull locations are listed in the order that they can be found by playing through the Campaign mode:

1. BLIND SKULL (SILVER)

Level: Sierra 117

Jump down the water-fall (where the two Phantoms come in-bound) and head right, past the dead tree. You'll see it on the ledge below.

Effect: No HUD

2. IRON SKULL (GOLD)

Level: Sierra 117

At the very end of the first level, after you've rescued Johnson, turn left and jump up to the ledge (with the "No Fishing/Swimming" sign) instead of boarding the Pelican. Walk to the end and jump up to the next ledge. Walk all the way around the building and you'll find the skull tucked into the corner.

Effect: Start from the beginning of the level when you die (no Checkpoints)

3. BLACK-EYE SKULL (GOLD)

Level: Crow's Nest

At the start in the UNSC control room, go up the steps and all the way to the back. Jump on the racks and up to the

big pipe. Walk to the end for the skull.

Effect: Only melee attacks can regenerate shields

4. GRUNT BIRTHDAY PARTY SKULL (SILVER)

Level: Crow's Nest

At the ventilation shaft (where the Drones fly in and out), just before you jump down to meet the Arbiter, look below the edge and you will see a small ledge with a green arrow sign pointing to it.

Effect: Killing Grunts with headshots will produce a humorous effect

5. TOUGH LUCK SKULL (GOLD)

Level: Tsavo Highway

After you exit through the tunnel (past the blue barrier), you will see a giant pipe to the left. Toward the end of the pipe, you will see support beams extending out over

the gap. Jump onto the first beam (the one closest to the left wall), then go to the end and you'll see the skull sitting on the ledge to the left.

Effect: Enemies are more aggressive and are able to "make saving throws" (dodge projectiles better)

6. CATCH SKULL (GOLD)

Level: The Storm

When you first encounter the Wraith tanks, keep one of them alive; the skull will disappear if both of them are eliminated. Drive a vehicle right up to the circular structure near the

red Wraith. Stand on top of the vehicle and use a grenade jump to get up to the roof (throw down a grenade, jump and use the explosion to give yourself a little boost). It'll take some practice. A Grav Lift will work here too, but they're hard to find.

Effect: Enemies throw many grenades

7. FOG SKULL [GOLD]

Level: Floodgate

right (behind the missile launcher). As soon as you hear the soldiers talk on your radio, a Flood will appear holding the Skull on the rooftop. Shoot him quickly before he jumps away. The Skull will fall to the ground so you can retrieve it.

Effect: No Motion Sensor

8. FAMINE SKULL [GOLD]

Level: The Ark

will see a large bridge/deck coming out of the rock on the left (just where the Ghosts come attacking). Use the rock face around the corner on the right to jump up and hop over to the extending ramp. Walk to the last beam and you will see the skull sitting just inside of the loop of the extending structure. You will need to do a grenade jump (see picture), deploy a shield and use it as a platform or use a Grav Lift to make it up to the skull.

Effect: Weapons dropped by enemies will have 50% less ammo

9. COWBELL SKULL [SILVER]

Level: The Ark

meet the Arbiter. After clearing out a few rooms, the Arbiter and the team will hold position at the entrance to a ramp that leads downstairs. In the middle of this hall you will see several openings that are stacked all the way up to the ceiling. The skull is in the top opening. Use the Grav Lift to boost up to it.

Effect: Bigger explosions

10. THUNDERSTORM SKULL [GOLD]

Level: The Covenant

You will find the skull at the top of the ramp.

Effect: All enemies go up one rank

At the start of the level, when you're walking down the hill toward the burning buildings, keep your eye on the first building to the

After clearing off the deck, Johnson will appear in a Pelican and ask you to follow him. As you make your way down the canyon, you

Pick up the Grav Lift inside the rounded bunker next to where the Scarab battle occurs. Hang on to it as you make your way up to meet the Arbiter. After clearing out a few rooms, the Arbiter and the team will hold position at the entrance to a ramp that leads downstairs. In the middle of this hall you will see several openings that are stacked all the way up to the ceiling. The skull is in the top opening. Use the Grav Lift to boost up to it.

When you pilot the Hornet, land on the second tower (the one the Arbiter cleared) before heading to the battle by the third tower.

11. WHYDY ("I WOULD HAVE BEEN YOUR DADDY") SKULL [SILVER]

Level: The Covenant

This skull is located in the hall with the seven blue Ring Holograms (spread out in three sections). You'll need to jump through the rings in

the following order (1 is close to the entrance and 7 is near the Prophet of Truth): 1, 3, 4, 6, 7, 5, 4, 6, 5, 4, 5, 3, 4. Note that each ring hums a different note—the correct sequence plays out the Halo theme. If done correctly, all the rings will start flashing and you will hear the tune. The skull will appear on the bridge to the Prophet of Truth. This can be done before or after the scene with the Prophet, but make sure you've cleared out all the enemies.

Effect: Alternate dialogue for Campaign mode

12. GILG SKULL [GOLD]

Level: Cortana

The skull is in the room with the central glass platform, where Cortana says "Very nice to meet you. You like games...so do I". When you enter the

room, you'll see some small platforms jutting out of the wall on the left. Jump onto the very tip of the purple mechanism with the glowing blue symbol; it helps to look down so you can see where your feet are (see picture). Jump to the left onto the first platform. Step out to the very edge and jump to the next higher platform above. Walk to the edge again and jump to the top platform. Walk across the tentacle-like strand to the skull.

Effect: Enemies have stronger armor and shields

13. MYTHIC SKULL [GOLD]

Level: Halo

The last one is the easiest. At the start of the level, when you enter the cave, you'll find a crevice

in the right wall. Follow it to the skull.

Effect: All enemies have double health

TERMINAL LOCATIONS

There are seven hidden Terminals that can be found within three of the later levels: The Ark, The Covenant and Halo. If you find all seven Terminals, you will be rewarded with the "Marathon Man" Achievement (worth 40 points). The Terminals also give you a bonus background story describing the last moments of the Forerunners. Unlike the Skulls, you don't have to start at the beginning of each level to find them—you can take advantage of Rally Points and find them in any order. Make sure you read the entire passage for each Terminal before backing out of the console or your discovery will not be counted (the text usually ends with the phrase "If Fragment Ends"). You also must play on Normal difficulty or above to gain the Achievement.

1. THE ARK (mission start)

The first terminal can be found after you clear out the enemies outside and enter the facility. The door immediately to the left will lead you to it.

2. THE ARK (rally point alpha)

The Terminal will be behind you when you activate the bridge console with Guilty Spark.

3. THE ARK (rally point bravo)

A Terminal room is located under the transparent ramp near the cache of weapons.

4. THE COVENANT (mission start)

In the first tower, instead of activating the elevator, keep going past the control panel and you'll find the Terminal on the other side.

5. THE COVENANT (rally point alpha)

Land the Hornet on the second tower (see also Thunderstorm Skull). The Terminal is next to the entrance.

6. THE COVENANT (rally point alpha)

Just like the first tower, the Terminal is across the elevator platform on the other side.

7. HALO (mission start)

At the very beginning of the level, stay to the right as you walk through the cave. Before dropping down the ledge to the snow bank Below, turn right and climb up the snow bank to the side (Cortana will say, "Where are you going?"). The Terminal is inside.

SPIDER-MAN

FRIEND OR FOE

Web-Head is at it again, this time swinging back with a bunch of new abilities and sidekicks in Activision's *Spider-Man: Friend or Foe*. One of the game's coolest features is the option to have a second player seamlessly jump in and out of the game at any time, allowing that person to take control of Spidey's sidekick and fight alongside him whenever they choose. Intricate combo and upgrade systems round out the game, and since we're huge Spidey fans, we've put together some tips to get you past the tough spots in *Friend or Foe*.

Strategy Guide by Geoff Arnold

GENERAL TIPS

Avoid Getting Surrounded

jump or web-swing out of the crowd to put some distance between you and your opponents.

The quickest way to lose your health is by allowing yourself to get surrounded by a group of enemies. Instead of playing "Rambo" and mixing it up in the melee, try to use Spidey's webs from a distance to take baddies down. If you find yourself surrounded, quickly

PHANTOM Tips

Small PHANTOMS are more of an annoyance than anything else, and shouldn't give you too much trouble. They have a low amount of health, but tend to attack in packs, so they can overwhelm you if you get surrounded. Pluck them from the sky using Spidey's Web Line Throw

and use them as projectiles against other PHANTOMS.

Medium PHANTOMS are a bit trickier to deal with, and are by far the most abundant enemy in the game. Many of them have ranged attacks, so it's best to beat them at their own game by using Spidey's Web abilities to take them down. Medium PHANTOMS have a moderate amount of health and are more resilient than small PHANTOMS, so it will take you a bit longer to defeat them. They also have a nasty habit of dodging a lot of Spidey's attacks, so it may take multiple web lines to actually grab them.

Large PHANTOMS are probably the most difficult enemy to deal with, just due to the fact that they resist a lot of physical attacks. The easiest way to deal with them is just by repeatedly tripping them with your web over and over, or having your partner grab onto them and holding them while you turn them into scrap. Be careful when multiple large PHANTOMS are nearby, as they are able to surround you and take your health bar down quickly. Stay at a distance and take them down one at a time.

Explore Everywhere

There are quite a few DNA Helixes, sub-rooms and breakable objects that aren't in plain sight. To make sure you don't miss anything, take the time to fully explore each area, including the foreground and background as well as rooftops, behind buildings and isolated platforms/land masses. Also be sure to smash everything in sight including any jar-type items, small and large rocks and anything else that looks breakable; these items are a source of both Power-Ups and Tech Tokens.

Save Power-Ups

You can earn Power-Ups by collecting them in-game or purchasing them from the Upgrade Lab in the Helicarrier. Try to save your Power-Ups for when you really need them and don't waste them wantonly on random enemies throughout the game. For example, a good

time to use your Hero Strike Power-Up is when you are completely surrounded by a number of large PHANTOMS, or when you come to a secret area and want to clear it quickly. Save your Mega Damage and Invincibility Power-Ups for bosses, large PHANTOMS or commander PHANTOMS—and don't forget that you can save Tokens by using Spidey's Web Sun abilities to earn Red Orbs, as opposed to buying Health Regeneration Power-Ups.

Upgrade Spidey First

him than any other character. It's beneficial to start by upgrading Spidey's Health, Toughness and Strength first, then concentrate on his Web Line abilities, starting with the Web Line Throw tree. The Web Shoot ability is unlocked after defeating Green Goblin, and the Web Sun ability is unlocked after defeating Rhino, so you'll have to spend a bunch of Tokens to upgrade these abilities as well.

Save all of your Tech Tokens to upgrade Spider-Man first, since you'll be spending more time playing as

COMBO METER MADNESS

The Combo Meter will help you to earn the maximum amount of Tech Tokens for each kill. The higher your Meter, the more Tokens you earn—and since upgrading characters can be fairly expensive, it's important that you try to get your Combo Meter to level four as quickly as possible. Here are some tips for maxing out your Meter quickly.

Abuse the Web Line Throw

Since the majority of the PHANTOMS are medium sized enemies, they are highly susceptible to Spidey's Web Line Throw. When you come to a group of enemies, sit on the outside and start spamming Web Line Throw; any enemies that come close will be sucked in and tossed back at other enemies with great force. This is by far the most effective way to max out your Combo Meter early, as the damage quickly adds up and raises the Combo Meter by a large margin.

1, 2, 3, Grab!

Also great for building your Combo Meter is the 1, 2, 3, Grab combo (medium PHANTOMS only). Start by hitting the PHANTOM with a three-hit combo, which launches them into the air, then jump up to meet them in midair and pelt them with another three-hit combo. After the third hit, the enemy is open for a grab, so you can grab them out of the air and toss them back down to the ground again. Once they hit the ground, they will bounce, allowing you to jump up and continue the pattern of three hits in the air and throwing them back down. You can easily rack up more than ten hits on most enemies with this repeatable combo.

Use Transmitters to Your Advantage

From time to time you will also come into contact with PHANTOM Transmitters; they're basically generators that churn out sets of PHANTOMS over and over. The Transmitters offer you a good chance to max out your Combo Meter if you haven't done so already. Destroy the first wave of PHANTOMS and back away from the Transmitter a bit (to keep your sidekick from destroying it), then wait for the Transmitter to churn out another group of PHANTOMS. This allows you to fight waves of enemies over and over and max out your Combo Meter early, so every kill you get later on can earn you the maximum number of Tokens.

Link Spidey's Abilities

As you progress through the game, you'll unlock the Web Shoot and Web Stun abilities, which can also be upgraded via the Upgrade Lab. Once you get comfortable with these abilities, you can really turn up the heat and crank out the hits in each combo. For example, you can start with Web Stun Constrict to bind them in place. As they are webbed, you can switch to Spidey's Dual Shot Web Shoot and pelt them with web balls until they break free. At this point you can grab them with a Web Line Slam and launch them, following the launch with whatever attack you choose. Combinations like these are not only highly damaging, but they also rack up the hits on your Combo Meter quickly.

SIDEKICK SELECTION

The Characters

There are 13 characters that you can unlock and choose to be Spidey's sidekick. Each character has his or her own strengths and weaknesses, and can be powered up through the Upgrade Lab just like Spidey can. Although many of the characters' physical attacks are similar, they each have two unique, highly-damaging special attacks that are effective against most PHANTOM types. Choosing one character over another doesn't have any bearing on the game's ending, so pick your favorite! Here's a quick list of each character and how they are unlocked:

New Goblin	Complete the Temple stage

Upgrading Sidekicks

When fully upgraded, your sidekick is a serious force to be reckoned with; they smash faces just as well as Spidey does, and in some cases actually do a better job than he will. When upgrading your sidekicks, I recommend working on their stats in this specific order: Second Special Move, Health, Toughness, then Strength. Most sidekicks' special moves encompass a broad area of effect and do a lot of damage to multiple enemies, and the longer that they live during each fight (Health and Toughness come into play here), the more damage they will be able to do overall.

MISSIONS

We've done the footwork for you and located all of the DNA Helixes, Keystones and secret area doors. We've also got some tips for beating down the bad bosses in each mission. Read on, true believer!

Tokyo, Japan

Stage 1: Industrial Plant

DNA Helix 1: The first team switch that you encounter will activate a platform that leads to this Helix. This

same switch activates a platform that allows you to progress through the level.

DNA Helix 2: This Helix lies on the main path in the center of an extendable bridge.

DNA Helix 3: To collect this Helix, activate the second team switch that you encounter along the

main path. The switch will elevate a platform in the center of the area; you'll have to double-jump from this platform to reach the Helix.

DNA Helix 4: The final Helix is suspended in the air between two vertical ramps near the end of the stage. To

collect it, stand at the center of one of the ramps, then jump and web-swing across to the other side.

Keystone: The Keystone is located near the fourth Helix, on a small walkway near the bottom left corner of

the area. Simply run across the walkway to collect it.

Secret Area: After you collect the Keystone, continue heading left to locate the entrance to the Secret Area.

Stage 2: Secret Lab

DNA Helix 1: Look for this Helix in the center platform in the room where you start. Snagging it will trigger

the release of PHANTOMS.

DNA Helix 2: This Helix is hidden inside a large piece of computer equipment near the door in the locked circular room.

Smash the equipment to expose the Helix.

DNA Helix 3: In the room after the second Helix, look for a circular platform surrounded by machinery in the center

of the room; double-jump up to reach the Helix.

Keystone: None

Secret Area: None

BOSS: Doc Ock

There are two generators in the room with Doc Ock which fire

laser blasts intermittently. Jump over the laser blasts and collect any of the boxes or crates on the floor, then toss them at the generators to inflict damage. Three direct hits should temporarily shut them down, and Doc Ock will come out to repair them. Quickly approach and use physical attacks or any remaining crates to hit him; after a short time, he will retreat. Each time you destroy a generator and Octavius repairs it, the generator's rate of fire will increase. Try to stay in the far corner of the room and throw crates from a distance to avoid being hit. Repeat this cycle until Ock is defeated.

Stage 3: The Rooftops

DNA Helix 1: The first Helix is on top of the roof of a small building near the starting point. Defeat the four large PHAN-

TOMS and hop across the gap to reach the building, then double-jump up to the roof.

DNA Helix 2: Look for this Helix on the main path just before you reach the PHANTOM Transmitter.

DNA Helix 3: This Helix also lies along the main path; look for it on top of the roof after stepping on a pressure plate

that triggers a bridge.

DNA Helix 4:

You can collect this Helix just after picking up the third Helix. Jump down onto the lower rooftop near the balloons and you'll be swarmed by a group of small PHANTOMS. Walk toward the camera and you will see the Helix near the right corner of the rooftop by a light post.

Keystone: The Keystone is on a ledge at the bottom of the building just to the left of the starting point. Defeat the

four large PHANTOMS, then hop across to the following building to locate it.

Secret Area: Head in the opposite direction of the second DNA Helix and you'll see a gap that you can jump across. Jump to the opposite platform to locate the door leading to the secret area.

Stage 4: Oscorp Japan

DNA Helix 1: This first Helix is in plain sight on the main path in the center of a circular platform.

DNA Helix 2:

Just after defeating the group of large PHANTOMS and unlocking the door to progress through the stage, you'll see a split in the path. If you head straight instead of right, you will come to a small room containing the Helix.

Keystone: None

Secret Area: None

BOSS: Green Goblin

Green Goblin will start by chucking Razoi Bats at you. They

will home in on you, so you'll have to jump to avoid them, then jump again as they come back toward you. After a few of these, he'll toss pumpkin bombs, which you can pick up and throw back at him for damage. Gobby tends to fly back and forth a lot, so walk up to the ledge and wait for him to stop moving before tossing your bombs. Don't wait too long to pick them up or they will explode into a noxious green gas which will hurt Spidey. After taking a few hits, Goblin will start firing homing missiles at you. These are more difficult to avoid, so try web-swinging before they reach you to avoid getting hit. As the fight rages on, Goblin will begin throwing more Razoi Bats and homing missiles. Avoid them and continue pounding him with bombs until he falls from his glider.

Tangaroa Island

Stage 1: Beachside

DNA Helix 1:

The first Helix is visible just after the starting point. Check the base of the cliff near some destructible rocks to locate it.

crossing the bridge to collect it.

DNA Helix 3:

The final Helix is up on a grass-covered platform on top of the sea cliffs. Jump up the stone platform on top of the tiki head, head left across the bridge, then move to the top of the screen. Jump up onto the small platform here, then jump again to reach the Helix.

Keystone:

Near the last part of the stage, the path will split—you can either scale the cliffs or follow the beach down to the right. Follow the beach and you'll see the Keystone in plain sight.

Secret Area: After collecting the Keystone, head back in the opposite direction and scale the first small cliff. Continue heading left to locate the door leading to the secret area.

Stage 2: Sea Caves

DNA Helix 1:

The first Helix can be found atop a cliff just off the beaten path. After stepping on a switch and activating a bridge that lets you progress, jump up to the top of the cliffs and head right to locate the Helix.

The Helix is in the center of this room.

Keystone: None

Secret Area: None

DNA Helix 2:

Once inside the cave, use the team switch to open a circular stone door leading to a small room.

BOSS: Scorpion

Scorpion begins by firing projectiles from his tail and slamming

the ground to cause boulders to fall; stay on the move to avoid getting hit by either. Make your way up to the platform where Scorpion stands and unload on him. Use caution when you get close, as he will wind up and perform a tail swipe; if you jump over this attack, Scorp will be temporarily dazed. Use this time to inflict maximum damage. After taking some hits, he will escape to another stone platform and begin firing projectiles again. When you inflict enough damage, the small platform on the right will sink into the lava, so you'll have to traverse the platforms on your left in order to reach him. After beating on him some more, the small left platform will sink into the lava and you'll have to repeat the process by using the platform on the opposite side. Continue avoiding his blasts along with the boulders and follow him around the room, attacking when you can to defeat him.

Stage 3: The Cliffs

DNA Helix 1: After defeating the first group of PHANTOMS you encounter, a team switch will appear.

Activate the switch and follow the bridge across, then jump down to the lower platform to locate the first Helix.

DNA Helix 2:

While inside of the large cavern, you'll have to fight a large group of PHANTOMS to unlock the door; the second Helix is inside the stone tiki head just to the left of the door.

DNA Helix 3: Locate the room that contains the door leading to the secret area and scale the rocks above. Head

left past the room with the door switch and jump across a small chasm to reach an area that contains the Helix.

DNA Helix 4:

After entering the last part of the stage (before reaching the Transmitter), walk to the circular platform and head left. Jump from the edge of the platform across the water and look near the very left edge of the wall for the Helix.

form and head left. Jump from the edge of the platform across the water and look near the very left edge of the wall for the Helix.

Keystone:

Inside the cavern you will eventually come to a fork in the path; activating the team switch and heading left instead of up will take you to a series of stone platforms. Follow the platforms to the end and defeat the PHANTOMS nearby, then jump up to the top to reach the Keystone.

Secret Area: The entrance to the secret area lies along the main path, just after you collect the Keystone. Look for the circular room with the face on the floor; the door is on the far right side of this room.

Stage 4: Ancient Ruins

DNA Helix 1:

After making your way down from the pyramid and onto the grassy plateau, head left and down to locate a team switch. Activate this switch and follow the path across to locate the Helix.

DNA Helix 2:

Make your way along the main path and eventually you will come to a wooden bridge with a nearby switch near the top of the screen. Activate the switch and jump onto the stone platform, then across the gap to the left plateau where the Helix is.

Keystone: None

Secret Area: None

BOSS: Rhino

Rhino hits pretty hard, so try to avoid his physical attacks whenever possible. He will intermittently

pound the ground and cause boulders to fall; they aren't very easy to spot, so stay mobile during this phase. After he stops hitting the ground, grab a boulder and toss it at him to inflict damage, then line yourself up in front of one of the electrified pillars around the room. After hitting Rhino with a boulder, he will charge you; jump out of the way at the last moment and Rhino will stun and damage himself. When Rhino retreats to the center of the room, he will periodically send out an energy blast that pushes you back. If you're close to the edge and the blast hits you, it's curtains, so steer clear of the edges as you jump around. After taking some hits, Rhino will start shooting energy waves around the area; simply jump to avoid these and wait for the boulders to fall once again. When he gets fairly low on health, Rhino will start sending out pulsating energy rings. Avoid these as you did with the energy blasts and continue on until he gives up.

Cairo, Egypt

Stage 1: Sun-Drenched City

DNA Helix 1:

Look for this Helix in a crate near the left side of the area where you fight the first large PHANTOM.

DNA Helix 2:

The second Helix lies in plain sight on the main path in the middle of a bridge.

DNA Helix 3:

After destroying the Transmitter, you will come to a small area of town where you will be attacked by a

group of large PHANTOMS. Defeat them, then activate the team switch near the top building and jump onto the platform to reach the upper roof and the Helix.

Keystone:

After collecting the third Helix, look for an archway to the left and head through it; the Keystone is in a small room on the other side.

Secret Area: The door to the secret area can be found near the beginning of the stage. Locate the first Helix and head into the next small area to find the door.

Stage 2: The Oasis

DNA Helix 1:

Look for a team switch just past the first locked door. Activate the switch and enter the room beyond to locate the Helix.

DNA Helix 2:

Just before you reach the end of the stage, you will see a team switch. Activate the switch and enter the room to collect the second Helix.

Keystone: As you enter the second part of the stage, you will come across another team switch. Activate this switch and enter the nearby room to collect the Keystone.

Secret Area: The secret area door is just before the end of the stage. Look for a switch that opens a door leading to the final part of the stage; instead of going through the door to the left, head right instead. Jump up the ledges to reach a wall and the door.

BOSS: Lizard

Fortunately, Lizard did not fall under the control of the PHANTOMS, and after investigating the matter he will decide to join up with Spidey and company.

Stage 3: Unearthed Catacombs

DNA Helix 1:

Defeat the large PHANTOMS in the first room and look for the team switch. Head into the

anteroom and check the right wall for the first Helix.

DNA Helix 2:

Locate the door leading to the secret area and follow the path down to reach the next room. Look for a door with a switch on each side and activate the switches by punching them. The Helix is in the center of this room.

DNA Helix 3: The final Helix lies in plain sight on the main path, just after you defeat Pestilence Lord.

Keystone:

After defeating the large group of small PHANTOMS, you will come to a door along the main path

with two wall switches, one on each side of the door. Punch both switches to open the door and look for the Keystone inside.

Secret Area: From where the Keystone is located, follow the ramp down into the area, defeat the large PHANTOMS, then head through the door. Walk through the next room and down another ramp to reach a large area; the door leading to the secret area is along the wall near the entrance.

Stage 4: Excavation Site

DNA Helix 1: Look for a door with switches on either side near the beginning. Activate both switches and you'll find the Helix inside the unlocked room.

DNA Helix 2:

You'll see a door with a team switch along the main path. After defeating the PHANTOMS in this area, you can activate the team switch and open the door to collect the Helix inside.

Keystone: None

Secret Area: None

BOSS: Sandman

Sandman will begin by firing waves of sand at you; simply jump over them

and head over to pummel him a few times. He will retreat to the center of the area and start pounding the ground, which causes large sand spikes to pop up. Avoid these as best as you can (a puff of

sand will show you where each spike is coming from) and continue beating on Sandman until he teleports back up to the top of the stage. At this point he will start sending large fist-shaped piles of sand at you. These fists will knock you off the ledge, so jump over them to remain safe. As the battle rages on, Sandman will start flinging more fists and sand spikes your way. Continue to avoid these and land punches when you can.

Transylvania

Stage 1: Oldworld Village

DNA Helix 1:

You will find this Helix directly on the main path, just before entering the door that leads to the

third section of this stage. The Helix is hidden behind a large wooden crate that must be smashed to collect it.

DNA Helix 2:

This Helix lies on the main path, but it's easy to miss. Just before reaching the end of the stage, you'll come to an area where you have to fight several large and medium PHANTOMS. Look for a crack here in the middle of the area—the Helix lies in the crack near the foreground.

DNA Helix 3:

After scaling the rocky cliffs leading to the upper part of the village, you'll find a team switch near the right

side of the ridge. Activate the switch and you will find the Helix in the area beyond.

Keystone:

Just after you enter the second part of the stage (look for the well), you'll have to fight a number of large PHANTOMS. Defeat them all and walk to the foreground of the area; the Keystone lies on a rock ledge just below the ground level.

Secret Area: Look for a switch on the ground in the area after collecting the Keystone. Activate the switch and hop up onto the wooden platform, then to the ledge above, to reach the secret area door.

Stage 2: The Manor House

DNA Helix 1:

In the first room of the house, you will face a number of medium PHANTOMS. Defeat them,

then activate the team switch on the wall to open a door leading to a room with this Helix.

DNA Helix 2:

In the room with the large hole in the floor, defeat all of the PHANTOMS, then activate the team switch. The Helix is on the far side of this room.

Keystone:

Just after collecting the first Helix, you'll come to another door with a team switch. Open the door and look for the Keystone inside, near the bed.

Secret Area: Just after the dining room, you will encounter a long hallway. If you look carefully, you'll see an adjacent hallway to your right that you can walk into (follow the carpet on the ground if you can't locate it). Look for the secret area door at the end of this hallway.

Stage 3: Graveyard Path

DNA Helix 1:

Head right from where you found the Keystone and look near the background for a cliff that you can scale. Climb up and look for the Helix behind a fallen obelisk near the right side of the graveyard.

DNA Helix 2:

Locate the secret area door and you will see a stone crypt near the left side of the door. Destroy this

crypt to locate the second Helix.

DNA Helix 3: Just before reaching the end of the stage, you'll find a switch that activates a bridge leading to a small graveyard.

Destroy the stone crypt in the far right corner of the graveyard to locate the Helix.

Keystone:

Along the main path you will see an entrance to a crypt near the background. Enter the crypt and you will find the Keystone near the back of the room behind some stone coffins.

Secret Area: The door to the secret area lies along the main path, just after a small, water-filled area.

Stage 4: Ancient Church

DNA Helix 1:

In the first main room you come to, defeat the group of PHANTOMS, then look for a team switch

near the upper left corner of the room. Activate the switch, then walk down the hall to locate a room and the Helix.

DNA Helix 2:

As you make your way through the church, you'll discover a team switch in the middle of a hallway. Activate the switch and enter the unlocked room to locate the second Helix.

Keystone: None

Secret Area: None

BOSS: Venom

Venom's main weakness is sound—and he knows this, so at the start of the fight he will "web" up the nearby bell. Punch the bell a few times while avoiding Venom's

attacks to knock the "webbing" loose, then punch the bell again to ring it; this will temporarily stun Venom, allowing you to get some free attacks in. After he takes damage, Venom will retreat to another part of the church. Pursue him down the hallway and repeat the pattern with both of the bells in the next room. Venom will take quite a bit of damage from this and will retreat even further into the church. There are three bells in the next room; ring them all to finish off Venom for good.

Nepal

Stage 1: Lower Village

DNA Helix 1:

Just past the Keystone near the foreground is a small, grassy plateau that you can jump down onto;

the Helix is located at the edge of the plateau.

DNA Helix 2:

After destroying the Transmitter, look for an area with a door leading through the mountain.

Above this door is a team switch; jump up to the platform above the door and trigger the switch to locate a small cavern containing the Helix.

DNA Helix 3:

After you defeat the Symbiote Warrior, you'll find an area where you will be mobbed by several large

PHANTOMS. Defeat them all and a door will open up nearby that leads to a cave containing the last Helix.

Keystone:

The Keystone is on the main path just after activating a switch that lowers a drawbridge. Look for it near the end of the bridge.

Secret Area: The door to the secret area lies along the main path, just before you reach a bridge switch. Look near the background on the upper ledge to find it.

Stage 2: Dark Caverns

DNA Helix 1:

The first Helix is in the same area as the door leading to the secret area. Walk to the foreground and

follow along the cliff's edge to locate it.

DNA Helix 2:

The second Helix is near the stage exit. Just after you come out of the locked door on the main path, look near the background by the front of the bridge to see it.

Keystone:

You'll find the Keystone on the left side of the huge set of steps close to the entrance. You might have to

walk a bit into the foreground to see it clearly.

Secret Area: The secret door isn't too difficult to locate, but it can easily be overlooked. Keep your eyes open as you walk along the main path, and eventually you will see a large, well-lit golden statue with the Keystone symbol on the front.

Stage 3: Upper Village

DNA Helix 1:

The first Helix is near the Transmitter. Walk to the foreground and you'll see a series of ledges below that you can jump to from a nearby lower ledge; the Helix is at the very end on the last ledge.

DNA Helix 2:

The second Helix is in the area just after the first Helix; it lies on the main path near a short bridge.

DNA Helix 3:

The last Helix can be found just before the entrance to the temple. Look for a small path leading left and you will see the Helix in front of a door.

Keystone: Once you find the waterfall entrance leading to the next part of the stage, check the right rooftop nearby to locate the Keystone.

Secret Area: The secret area door can be found on the main path, at the top of a set of stairs near the left wall.

Stage 4: Temple

DNA Helix 1:

After exiting the first main room inside the temple, you will come to a short hallway. Watch the right side of the hallway as you walk down for a small opening that leads to a room containing the first Helix.

DNA Helix 2:

While making your way along the main path, you will spot a door switch. Activate the switch and

head into the next room, then walk toward the right side of the room to find a small sub-room containing the second Helix.

steps. At the top of the first set of stairs, head left to locate another sub-room and the last Helix.

Keystone: None

Secret Area: None

BOSS: Mysterio

When the fight starts, make your way to the far left or right corner of the room and

watch the stone faces underneath Mysterio; they will fire lasers that crisscross the room, so you will have to time your jumps to avoid them. After a few sets of lasers,

Mysterio will start throwing cluster bombs at you, and large bricks will begin to fall from

the ceiling. Keep moving to avoid getting hit by them and start grabbing bricks. Jump up and throw the bricks at Mysterio to inflict damage; after three hits, he will jump down to the floor. At this point, Mysterio will do one of the following five attacks, depending on your distance to him and how much health he has left:

- **Attack 1**—Mysterio creates purple beams of light on the floor. Keep moving and don't stand close to him to avoid getting hit.

- **Attack 2**—Mysterio fires small energy projectiles at you. Jump over them to avoid them.

- **Attack 3**—Mysterio fires a large, pulsing energy ring, which can be avoided by jumping.

- **Attack 4**—Mysterio fires a set of projectiles toward you. Again, keep moving and jump over them to avoid them.

- **Attack 5**—Mysterio fires laser beams from his hands that sweep the room, and also random projectiles. Jump as you see Mysterio appear to avoid the beams and blasts.

Damaging Mysterio after any of these phases will cause him to flee back up to the rafters, and as the battle rages on, the stone faces below him will begin to fire multiple projectiles as well as laser beams. If you stay in the far left or right corner of the room, you can avoid the projectiles completely and only worry about dodging the laser beams. Continue picking up bricks and damaging Mysterio at every opportunity until he throws in the towel.

Wii tips

NOTE: When entering codes with the Wii Remote, be sure that the controller is oriented in the direction recommended by the game in question. For example, pressing **Up** on the D-pad when the Wii Remote is vertical is not the same as pressing **Up** when it's horizontal, because the D-pad is rotated along with the controller.

BLOODY WOLF (Virtual Console)

Cheat Codes

Enter any of the following codes at the title screen, while the words "Push Run Button" are flashing:
 Faster gameplay—Press **Up, Down, Right, Right, 2, 2, 1**, you'll see the number "2" appear to confirm the code. (On the Classic Controller, press **Up, Down, Right, Right, A, A, B, SELECT** instead; on the GameCube controller, press **Up, Down, Right, Right, A, A, B, Z**.)

Hover mode—Press **Down, Up, Left, Left, 1, 1, 2**, you'll see the number "3" appear to confirm the code. With this code in place, press the Jump button to hover in mid-air; press it again to descend. (On the Classic Controller, press **Down, Up, Left, Left, B, B, A, SELECT** instead; on the GameCube controller, press **Down, Up, Left, Left, B, B, A, Z**.)
 Sound test—Hold **Up** + **1** and press **=**. (On the Classic Controller, hold **Up** + **B** and press **SELECT** instead; on the GameCube controller, hold **Up** + **B** and press **Z**.)
 Level select—Press **1, 2, 2, 1, 2, 1, 1, 2**, then hold the D-pad in the direction shown below and press **+**:
 Level 2—Hold the D-pad diagonally **Up/Right**
 Level 3—Hold the D-pad **Right**
 Level 4—Hold the D-pad diagonally **Down/Right**
 Level 5—Hold the D-pad diagonally **Down**
 Level 6—Hold the D-pad diagonally **Down/Left**
 Level 7—Hold the D-pad diagonally **Left**
 Level 8—Hold the D-pad diagonally **Up/Left**

(On the Classic or GameCube controller, press **B, A, A, B, A, B, A** instead, then hold the D-pad in the direction indicated above and press **START**.)

Free Weapon Power-Ups

During the game, you can earn free weapon power-ups by climbing partway up any surface that can be climbed (like a fence or the side of a truck) and pressing the following buttons simultaneously while your character is in his "climbing" pose. **Important note:** This will only work if your Life Meter has two red bars of energy—no more, no less. You must jab the buttons at the exact same instant in order to trigger the code.

50 bazooka rounds—Tap **Left** + **1** + **2** simultaneously. (On the Classic Controller or GameCube controller, tap **Left** + **A** + **B** instead.)

50 shotgun rounds—Tap **Right** + **1** + **2** simultaneously. (On the Classic Controller or GameCube controller, tap **Right** + **A** + **B** instead.)

Virtual Invincibility

When your Life Meter has exactly one red bar of energy, enter a doorway, cave entrance or military truck that leads to a room with enemies, crates and/or hostages. You must then exit that room while you still have exactly one red bar of energy, so don't pick up any muscle emphasis tablets, medicine or food. Once you're back outside, hold **Up** so that your character is pushing up against the doorway, cave entrance or truck that you just came from. (Note: To do this trick with one of the military trucks, you must hold **Up** while pushing against the rear corner of the truck.) While continuing to hold **Up**, quickly tap the **+** button and the **1** button simultaneously. (On the Classic Controller or GameCube controller, hold **Up** and tap **START** + **B** instead.) You'll hear a chime and your character will flicker to confirm the code. When your energy runs out, you will now reappear with full energy at the spot where you died instead of going back to restart at the last checkpoint. **Important note:** This trick will only work in certain doorways in each stage, so if you can't activate it, try the next room you can find. It does not seem to work anywhere in Stage 6. Also, the effects of the code will be canceled each time you clear a stage or if you lose a life by falling off the screen. So stay away from the bottom of the screen—if you run out of energy and your "death" animation is triggered while you're near the lowest point of the playfield, your body can still fall all the way off the screen in any part of any stage, even if you're not on a bridge or other precipice.

When the Area and Round number screen is displayed, press **Up** or **Down** on the D-pad to choose any starting stage. Note: The flag that Master Monk is holding shows the level number. There are 50 rounds in each of the ten levels, for a total of 500 rounds.

(On the Classic Controller, hold **SELECT** + **A** and press **Up/Left**; on the GameCube controller, hold **Z** + **A** and press **Up/Left**.) When the game starts, all of the spheres will be gold and will not change to their real colors until you place them on the correct colored panels. This makes the game more challenging, so give it your best shot and make Master Monk proud! Yeah!

Special Bonus

If you clear a level without killing any enemies and finish while the timer is still blue, you will receive a 10,000-point "Special Bonus" and five free diamonds.

Dance of Death

When a Kappa (turtle) creature stands on one of the spheres to do his dance, watch what happens if you let him keep dancing without knocking him off. After about 50 seconds, he will get tired and die, just like the monthly *Tips & Tricks* magazine did!

You'll be transported to a secret cave where you can practice playing any of the bonus rounds by collecting the corresponding animal statues. Note: This code may not work when you first power-up the game; you may have to enter the game's first level, then press the **Home** button and select "Reset" to return to the intro sequence before it will register.

DONKEY KONG COUNTRY 2

DIDDY'S KONG QUEST (Virtual Console)

Music Test

At the "Select Game" menu, choose an empty save slot as if you were about to start a new game; then, when the player select menu comes up, highlight "Two Player Contest" and press **Down** very quickly five times. The Music Test will appear. Press **Right** or any of the action buttons to advance to the next tune, or press **Left** to go back through the list of names.

Cheat Mode

Access the Music Test as described above, then press **Down** very quickly five more times. A top-secret Cheat Mode option will appear. With this option highlighted, you can enter the following cheat codes (you'll hear a tone and a monkey noise each time you enter a code correctly):

Start with 50 lives—**Y, A, SELECT, A, Down, Left, A, Down**

Start every stage with both Diddy and Dixie, remove all "DK" barrels from the game—**B, A, Right, Right, A, Left, A, X 75 Kremloins**

Enter the game's first stage, "Pirate Panic"—it doesn't matter if you do this in a new game or a saved game. Walk to the right until you see the entrance to K. Rool's cabin. Watch out for the two bananas on the ground right in front of the door; you must avoid these two bananas throughout the entire sequence or else the trick will not work. Walk inside the cabin, but do NOT touch the red 1-Up balloon; just walk out immediately. Back outside, you must carefully jump over the two bananas without touching them. Now go to the right and grab the first bunch of bananas you see on top of a set of barrels. Next, get back into the cabin without touching the two bananas in front of the door. This time, grab the red balloon and exit. Finally, go back to the barrels again and grab that same bunch of bananas, returning to the cabin without touching the two bananas in front of the door. When you enter, you'll find a spinning coin that gives you an incredible 75 Kremloins. Now you can access the Lost World through Klubb's Kloos on any part of the island.

KIRBY: CANVAS CURSE

Secret Characters

- Dedede Ball—After you unlock the Waddle Dee Ball, you can buy the Dedede Ball in the Medal Swap for 20 medals. He has seven hit points, and swings a hammer when you tap him. He also cannot obtain powers. He's much larger and heavier than Kirby.
- Meta Knight Ball—After you unlock the Dedede Ball, you can buy him in the Medal Swap for 25 medals. He only has three hit points. He's much lighter than Kirby, but he's slightly stronger.
- Waddle Doo Ball—After you've beaten the game at least once, insert Kirby and the Amazing Mirror or Kirby: Nightmare in Dreamland into the Game Boy Advance cartridge slot of your DS. When you start a game of Kirby: Canvas Curse, Waddle Doo Ball will be available. An alternative way to unlock him is to beat the game with all four of the other characters. He has five hit points and the Beam ability. He can't obtain any other powers.

Jump Game Medal

The Jump Game unlocks in the Game Select menu after you beat the game with every character. If you manage to launch Kirby 1,500 meters, you'll land right on top of a medal, which is sitting on the course. The best way to launch Kirby this far is to preserve enough ink so you can draw a second ramp when Kirby is already in the air.

NEW SUPER MARIO BROS.

Play as Luigi

At the "Select a File" menu in Mario Game (single player) mode, highlight your save file, then hold L + R and press the A button; you will hear Luigi say his name to confirm that you have entered the code correctly.

(Note: This code only works on a save file where you've previously completed the game.) While on the map screen, press START to pause the game and press L, R, L, R, X, X, Y, Y at the pause menu. A message will appear to confirm the code. In Secret Challenge Mode, the screen scrolling works as it did in the original *Super Mario Bros.*; i.e. you can't go back in the direction from which you came.

Fireworks

To trigger the fireworks that appear when you touch the flagpole at the end of a stage, make sure that the last two digits of the timer are the same number (i.e. 99, 88, etc.) at the exact instant when Mario or Luigi touches the flagpole. If your timing is right, you will be rewarded with explosions equal to that number. Since each explosion is worth 4,000 points, you can get a total of 36,000 extra points at the end of each stage instead of the maximum of 8,000 points earned by just hitting the top of the flagpole. Activating fireworks also triggers a Toad House to appear at each stage's starting point, with a reward inside that is also determined by the last two digits of the timer. If the numbers are 11, 22 or 33, you'll find a random power-up inside the Toad House that appears. If they're 44, 55 or 66, you'll get a 1-Up, and if they're 77, 88 or 99, the Toad House will contain a Mega Mushroom.

Extra Treats

When you're training your dog to learn tricks, a yellow light bulb will appear over its head. You can grab the light bulb and feed it to your dog like a treat! You might also notice that sometimes a yellow bone will appear if you've been petting your dog a lot. You can feed this to it, too.

Constant Walks

Usually you can only walk your dog every half-hour. However, there is a trick that you can use to get around this limitation. Walk your dog to the park, then switch one of its accessories. The game will automatically save. Turn off the game and you can take your dog for a walk again immediately! This is a great way to increase your chances of finding rare presents.

Mystery Presents

When walking your dog, sometimes you'll see a present just lying on the sidewalk. Your dog will only pick it up if you notice the present and jerk your pook in the direction of the present. These presents are usually better than the ones that are already marked by Question Marks on the map.

Microphone Tricks

- If you blow into the DS microphone at the main menu screens, bubbles will appear and the menu options will bounce.
- If you blow into the DS microphone during the instructional demo, the characters on the bottom screen will turn around to look at you.
- If you blow into the DS microphone when the map is displayed on the bottom screen during a cutscene, the character will react. Blow gently and the character will fight the wind; blow hard and he or she will be blown away.
- If you blow into the DS microphone during a match, your character will speak.
- If you blow into the DS microphone at the title screen, a mini-game will begin. A score will be displayed and a giant puyo will fall from the top screen. The object is to keep the puyo from falling off the bottom screen by using the stylus to bounce it back up. For best results, keep the stylus in contact with the touch screen and push the puyo down from below. You'll score a point for each bounce. After ten bounces, another puyo will appear; after 20 more bounces, a third will appear, with more appearing every ten bounces after that (up to a maximum of six). The last puyo to appear will be a sui-

sance puyo. If any one puyo falls off the screen or if you hit a puyo in its center, all of the puyo on the screen will pop. You can also push all of the puyo back up at once by blowing into the DS microphone, but you lose points for doing this.

Secret Mini-Game

If you complete the WakuWaku Course or HaraHara Course in Single Puyo POP mode at Normal difficulty or higher, you can play a mini-game while the credits are being displayed. Look closely at the pictures of each character and find the difference between the picture on the top screen and the one on the bottom screen. If you tap the part of the picture that's different on the touch screen, it will advance to the next character. (Note: You must tap it twice). Nine different characters will be displayed in succession, or 16 if you cleared the course without continuing. If you identify the flaw on all of the characters before the credits end, a special picture will be displayed.

RESIDENT EVIL: DEADLY SILENCE

Special Key

If you clear the game and get the "best" ending for either character, you will earn a special key. (To get the best ending when playing as Jill, you must rescue both Chris and Barry. To get the best ending when playing as Chris, you must rescue both Jill and Rebecca) If you load your game from a save where you unlocked the key, it will appear in your inventory at the start of the game. The key unlocks the door behind the dressing room (the room with the huge mirror on the wall) on the first floor of the mansion. You have to get the Armor Key first so you can unlock the big brown double doors to the east of the central room. Inside this room are brand-new outfits for Chris and Jill; one each in Classic mode and two each in Rebirth mode.

Master of Knifing

Beat the game once in either Classic or Rebirth Mode to unlock a five-stage mini-game called "Master of Knifing."

Rocket Launcher

If you beat the game in under three hours, you'll unlock a Rocket Launcher with unlimited ammo that you can use from the start.

Note that items that you unlock are restricted to the file you used to save your clear data—if you got it by playing JillClassic, you can only use the item during a replay of JillClassic, etc.

Secret Cheat Codes
 Enter the following cheat codes at any time during the game (not while paused). Each time you enter a code successfully, a message will appear in the upper left corner of the screen to confirm. Note: Most of the codes cannot be deactivated once you've turned them on; you must exit the game in order to restore the game to normal. Do not save your game after entering codes; if you do, the codes may be permanently activated in your save file. Also, some codes may cause unpredictable results which may cause the game to "crash," especially if you have several codes in effect at once. Codes that modify the appearance or behavior of vehicles or pedestrians will usually not affect those that are already in the immediate vicinity; you'll see the effects when new vehicles or pedestrians appear. The codes that cause

vehicles to appear may not work if you're too far from a street or other area where vehicles are allowed to drive. Activating cheat codes will lower your criminal rating number.

Secret Cheat Codes

Enter the following cheat codes at any time during the game (not while paused). Each time you enter a code successfully, a message will appear in the upper left corner of the screen to confirm. Note: Most of the codes cannot be deactivated once you've turned them on; you must exit the game in order to restore the game to normal. Do not save your game after entering codes; if you do, the codes may be permanently activated in your save file. Also, some codes may cause unpredictable results which may cause the game to "crash," especially if you have several codes in effect at once. Codes that modify the appearance or behavior of vehicles or pedestrians will usually not affect those that are already in the immediate vicinity; you'll see the effects when new vehicles or pedestrians appear. The codes that cause vehicles to appear may not work if you're too far from a street or other area where vehicles are allowed to drive. Activating cheat codes will lower your criminal rating number.

Secret Cheat Codes
 Enter the following cheat codes at any time during the game (but not while paused). Each time you enter a code successfully, a message will appear in the upper left corner of the screen to confirm. Note: Most of the codes cannot be deactivated once you've turned them on; you must reset the PlayStation 2 in order to restore the game to normal. Do not save your game after entering codes; if you do, the codes may be permanently activated in your save file. To keep your saved game from being affected, remove your memory card before entering any cheat codes and leave it out until after you turn off the PS2. Also, some codes may cause unpredictable results which may cause the game to "crash," especially if you have several codes in effect at once. Codes that modify the appearance or behavior of vehicles or pedestrians will usually not affect those that are already in the immediate vicinity; you'll see the effects when new vehicles or pedestrians appear. Mega Man X4: Alternate Mega Man X

At the *Mega Man X4* character-select screen, enter the following code carefully: Highlight Mega Man X, press the O button twice, press Left six times, then hold L1 + R2 and press START. When the game begins, Mega Man's costume will be slightly different—his arms and legs will be purple instead of light blue. More importantly, as you play the game with this code in place, you'll find different power-up items in the capsules that Dr. Light has scattered throughout the levels.

Mega Man X4: Play as Black Zero

At the *Mega Man X4* character-select screen, enter the following code carefully: Highlight Zero, hold the R1 button, press Right six times, release R1, hold O and press START. When the game begins, Zero's costume will be black instead of red. Unfortunately, this code has no effect on the gameplay.

Mega Man X5: Start With Ultimate Armor

At the main menu in *Mega Man X5*, select "Game Start." At the player select screen, move the cursor to Mega Man X, then press Up twice, then Down nine times. To unlock Zero's Ultimate Armor, move the cursor to him and instead press Down twice, then Up nine times. You'll hear a special sound effect after entering either code correctly. When you begin the game, the player you chose will be wearing the Ultimate Armor.

Mega Man X6: Secret Codes

Use these codes to play as alternate versions of X or Zero in *Mega Man X6*. Note that you can only use one code at a time; for example, if you want to play as Nightmare Zero, you won't be able to use Ultimate Armor X in the same game.

• Ultimate Armor X—Press START at the first *Mega Man X6* title screen, then press Left, Left, Left, Right at the Game Start/Continue/Option menu. You'll begin the game with X's Ultimate Armor, which is very much identical to the same Armor from *Mega Man X5*. It allows X to fire a super charged shot, hover in place and perform the Mega Crush attack at will.

• Nightmare Zero—Press the START button at the first *Mega Man X6* title screen, then press L1, L1, L1, R2 at the Game Start/Continue/Option menu. When you rescue Zero after defeating him in battle, you'll play as the Nightmare version of Zero instead of the normal version. Nightmare Zero has all of Zero's normal moves, but he is much more powerful.

Shinobi III: Return of the Ninja Master: Infinite Shuriken

Visit the "Options" menu and change the "S.E." (sound effect) setting to "Shuriken" [sic]. Next, move up to the "Shurikins" [sic] setting and change it to read "00". Wait a few seconds, and the double-zero will turn into an infinity symbol.

Shinobi III: Return of the Ninja Master: Invincibility Code

Choose "Options" from the title screen and highlight the "Music" option. Choose the tune called "HE RUNS" and press **X** to listen to it, then play "JAPONESQUE," "SHINOBI WALK," "SAKURA" and "GETOUTA" the same way. If you pressed **X** at each song and played them in the correct order, you should have heard a brief tone when you hit **X** at the last tune; the invincibility code is in place.

Sonic the Hedgehog: Stage Select/Sound Test

At the title screen—just as Sonic is starting to appear—press **Up**, **Down**, **Left**, **Right**. You'll hear a chime. Now hold **□** and press **START** to get a secret menu that allows you to start at any stage or hear any of the game's music or sound effects.

Sonic the Hedgehog: Cheat Code

- Slow-Motion—Press **START** to pause, then hold the **X** button to play in slow motion. If you tap the **○** button while paused, you'll advance the action one "frame" at a time.

- Debug Mode—When the name of the current zone appears in big letters at the start of a stage, press the **□** button and hold it down until Sonic appears. Your "Score" indicator will be replaced by a bunch of hexadecimal numbers. Now you're invincible, the only thing that can kill you is if you fall off the screen. Press **X** during gameplay to change Sonic a different object from the game; while Sonic is a different object, you can move the object anywhere in the current stage with the D-pad. Also, when in "object" mode, press **□** to change to a different object, **○** to place a copy of that object on the screen or **X** to change back into Sonic and continue play. Use this feature to modify the game's stages or even "draw" hundreds of gold rings on the screen; when you change back into Sonic you can pick them all up.

Sonic the Hedgehog 2: Stage Select

This code gives you all of the Chaos Emeralds; you can grab 50 rings and jump to change into Super Sonic. You'll also be able to see the "good" ending when you beat the game.

Sonic the Hedgehog 2: Debug Mode

At the stage-select menu (see above), highlight "Sound Test" and listen to sounds 01, 09, 09, 02, 01, 01, 02 and 04 in order; you'll hear a chime to confirm. Now highlight the name of any stage, hold the **□** button and press **START**; don't release **□** until the stage begins. See the codes for the original *Sonic the Hedgehog* above to find out how the debug mode works; the only difference is that you don't get invincibility when you enter the Debug Mode in *Sonic 2*.

Sonic the Hedgehog 2: "Night" Mode

Enter the "Debug Mode" code above, then highlight the name of any stage at the stage-select menu, hold the **○** button and press **START**. This darkens the graphics, making it appear as if you're playing at night.

Vectorman: Hidden Game + Level Warps

When the Sega logo appears at start-up, notice that you can move Vectorman around the screen with Controller 1. To find a hidden game, move Vectorman under the Sega logo and shoot straight up at it exactly 24 times. Next, make Vectorman jump up and hit his head on the logo exactly 12 times. You'll see the words "Get Ready" on the screen, then the letters "S", "E", "G" and "A" will begin to fall from the sky; 120 of them, to be exact. If you catch between 90 and 109 letters, you'll be able to start the game at Day 5; if you can catch 110 letters or more, you'll warp to Day 10.

Vectorman: Blow Up Sega

Also at the Sega logo screen, stand on the ground just slightly to the right of the logo and fire your weapon straight up into the air. There's a TV set hidden just off the screen; if you blow it up, it will reveal an Orb power-up. (You'll have to jump up from the logo to grab it.) If you detonate the Orb, the Sega logo will go dark and the background will stop moving.

Vectorman: Cheat Codes

At any time during the game, press **START** to pause, then enter any of the following codes:

Refill your energy counter at any time—**□, X, Right, □, □, Down, □, X, Right, □**
See the programmers' debugging coordinates—**X, □, Left, Left**

Five dots will appear around Vectorman and follow him wherever he goes—**□, X, □, □, □, X**

When you get hit, the game will slow down in order to help you to recover safely—**Down, Right, □, □, Up, Left, □**

Vectorman turns into a small arrow—**□, □, Left, Left, □, □, □** (Note: This works like a level warp; you can move the arrow anywhere in the current level without taking any damage, so use it to skip the tougher parts of the game. You can't shoot TVs or collect power-ups while you're an arrow, but you can destroy many enemies just by touching them. When you want to change back into Vectorman, just pause and enter the code again.)

Vectorman: Super Cheat Menu

At the Options menu, press **□, X, X, Down, □, X, X, □**. You'll be taken to a top-secret cheat menu that allows you to adjust your health meter and start at any stage with any weapon.

Upgrade to next most powerful weapon—**□, □, Left, Left, Down, □, Down**

Virtua Fighter 2: Boss Code

At the character-select screen, hold **Left** or **Right** on the D-pad (or **Right** if you're Player 2). The cursor will cycle quickly through the available fighters. After a few seconds, the announcer will say, "Five... four... three... two... one..." then you'll hear a metallic sound. Dural is now a playable character; you'll find her just to the left of Akira (or to the right of Jacky).

SHARK TALE**Cheat Codes**

During any of the levels where you can obtain pearls, press the **SELECT** button to bring up the controller screen, then enter any of the following codes. Some creatures will fly off the screen when touched—Hold **L1** and press **□, □, □, □, X, □, □, □, □**

At the "Enter Name to Start New Game" prompt, enter "HCRAYERT" as your name and select "Enter;" you'll see the name disappear. Now simply back out of the "Enter Name" screen and unpause; you'll warp directly to Chapter 16 with at least 44.38% of the game completed. This code also gives you 200,000 Hero Points, all four Boss Awards, the Web Zip upgrade and six Speed Swing upgrades. You can also enter the code at the "Enter Name" prompt that appears when you load the game without a save file present. Entering the code repeatedly will allow you to rack up additional Hero Points; they won't count toward the 50,000 you need to finish Chapter 16, and they may not appear in the Hero Points total at your "Status" screen, but they'll be there when you enter a Spidey Store.

BETLE ADVENTURE RACING

Cheat Menu

Race on the Coventry Cove course in Championship mode until you see a barn on the right side of the road with two

haystacks in front of it. Drive through the haystack on the left and you will smash a hidden crate with a picture of a flower on it; you'll also hear a voice say, "Groovy!". Note that the crate will not be there unless you are playing in Championship mode. Once you've smashed the crate, finish the race; the words "Cheat Menu Activated" will appear at the Player Results screen. Now return to the main menu and access the Options screen; you'll find a new option called "Cheats" at the bottom. Each item on the cheat menu must be "unlocked" before you can use it; you will unlock a new cheat each time you smash a flower crate in Championship mode. Some of these crates are very well hidden, so you're going to have to do a lot of searching to find them.

DIDDY KONG RACING

Play as Drumstick

To play as Drumstick, you must first earn all of the trophies and amulets in all stages. Once you've done this, return to the main area where Taj can be found and look for the frogs that jump around in the watery area in front of the giant Wizpig head. One of the frogs will have a red rooster comb on its head; if you touch that frog with your vehicle, Drumstick will be released.

Play as T.T.

To play as T.T. you must race on each course in Time Trial mode until T.T. comes out to challenge you; he won't appear until you beat the pre-programmed track record in a particular track by a fairly large margin. When he challenges you, you must defeat him in a race on that course. Once you beat him in a particular track, a small T.T. icon will appear when you select that track in Time Trial mode. When you beat T.T. and earn this T.T. symbol in every single track, T.T. will appear as a playable character.

Metal Gear Solid 4: Guns of the Patriots

Publisher: Konami
In Stores: 1st Quarter 2008

For Snake's final adventure in the *Metal Gear* series, he returns in a campaign that takes him to the Middle East to destroy Liquid Ocelot and his company Outer Haven, the umbrella company that is amassing a private army capable of destroying the United States. With this being the series' ender, expect to see favorites like Raiden, Meryl Silverburgh and Roy Campbell (plus others) make appearances as well. Director Hideo Kojima has promised that all of the plot twists of the previous games will be resolved here. In a preview trailer shown during the summer, Snake and Meryl were seen hunting down Revolver Ocelot before succumbing to what we assume is a nanomachine attack. A new feature of the game is the close-quarters combat system, and one can only hope that the one-on-one fight scene between Vamp and Raiden we've been shown is indicative of how it looks and works. Other additions include a new Codec with the ability to replay messages sent on it; an advanced alert system that keeps you constantly aware of where threats lie and your danger of being detected; some new moves that will assist Snake while in cover; and a brand new OctoCamo suit that allows the user to blend in with the environment in a matter of seconds. It all promises to be a spectacular end to the franchise.

Wet

Publisher: Sierra
In Stores: 4th Quarter 2008

Lara Croft, meet Ruby, the acrobatically gifted heroine of developer Artificial Mind and Movement's new action game, *Wet*. Deadly with a katana or gun, Ruby's true appeal is her ability to vault through rooms, performing gymnastic feats worthy of Cirque du Soleil while exterminating all the bad guys. The target lock feature makes it possible to careen off a wall and slide through a room on your knees while simultaneously capping several enemies in a slick and seemingly choreographed manner. With its "wild west" feel, *Wet* definitely doesn't skimp on the bloodshed; it also features some finishing moves that will make more than a few men playing the game cringe.

Bomberman Land Wii

Publisher: Hudson
In Stores: January

Previously only available in Japan, *Bomberman Land Wii* is finally coming to American shores. There are over 50 mini-games to play, a story mode where you defend Bomberman Land as well as a multiplayer mode. Most of the mini-games don't have the traditional Bomberman gameplay; they're more like something out of *Mario Party*. But they all use the Wii Remote to perform functions like bombing coins that

the rest of a screen, guiding Bomberman through obstacles. Maybe the best thing about *Bomberman Land Wii* is that it includes the original multiplayer *Bomberman* (called Battle Pack Mode here) for people who remember and love the classic version.

Killzone 2

Publisher: Sony
In Stores: 2008

Departing from the previous games in the series, *Killzone 2* takes place on Helghan, the enemy planet of the Helghast, an extremely hostile terrain for the Legion. Your mission is to capture Helghast leader Emperor Visari and stop the Helghast at their base of operations. *Killzone 2* is a fast-paced shooter; the new environment should be challenging to even dedicated *Killzone* fans with its complex lighting effects and harsh, unfamiliar conditions. A PS3 exclusive, the game features seamless transitions between cinematics and gameplay plus physics that have each character reacting differently depending on the weapon you've equipped and how you hit them.

Mario & Sonic at the Olympic Games

Publisher: Sega
Available Now

Wii

It's the team-up you never thought you'd see: Nintendo and Sega's mascots in the same game! The rivals will be pitted against each other in over 20 Olympic events like table tennis, track and field and swimming. The game includes single and multiplayer tournament and circuit modes in venues based on

the real-life 2008 Olympic games in Beijing (with some artistic license to make them fit into the Sega/Nintendo universe). Joining the clash will be over 16 characters from each side, including Peach, Wario and Tails. Each character will have different stats with particular advantages or disadvantages. You'll even see some classic characters acting as referees throughout the game. A DS version will also be available in early 2008.

Lost Odyssey

Publisher: Microsoft
In Stores: February

Lost Odyssey comes from *Blue Dragon* developer Mistwalker; it's an RPG penned by famous Japanese author Kiyoshi Shigematsu. The story follows the plight of a man, Kaim Argonar, who has survived countless battles as he has been sentenced to live as an immortal for over 1,000 years. Since *Lost Odyssey* comes on four dual-layer DVDs, you might end up playing the game for that long as well! Yes, it's the biggest Xbox 360 game ever.

Kaim has no memory of his past and is joined by a characters that will help him unravel his past and future. There's no lack of talent on the development team: Producer Hironobu Sakaguchi has worked on countless *Final Fantasy* games, as has composer Nobuo Uematsu.

Sonic Riders: Zero Gravity

Publisher: Sega
In Stores: 1st Quarter 2008

In this sequel to *Sonic Riders*, the iconic hedgehog competes with the Babylon rogues in the Extreme Gear Competition on a variety of hover vehicles. The prize they seek is an artifact that can control gravity. Tails, Knuckles, Amy and Jet are among the 18 playable characters. There are also new moves, like the Gravity Dive and Gravity Warp, both of which can help to boost your speed (although the latter will slow down your opponents as well). The game has 16 new tracks, including an aquatic and outer space level. You'll also be able

to upgrade the vehicles throughout the game and post your data online (with the Internet connection, at least) for your friends to see.

Resident Evil 5

Publisher: Capcom
In Stores: 2008

The *Resident Evil* series makes its return to the gaming scene—was there ever any doubt? Producing this chapter is Jun Takeuchi, who worked on the first two games and also produced *Lost Planet*. He's said that *RE5* will play similarly to *Resident Evil 4*, which makes us very happy. *Resident Evil 5* is a true sequel that pits S.T.A.R.S. operative Chris Redfield against more zombie-ish (but apparently more aware and humanlike) enemies. Since the game takes place 10 years after the original *Resident Evil*, Redfield now belongs to a group called the BSAA and the game takes place in a desert environment.

The Simulators are original arcade-style mini-games where you aim for a high score. With over 30 levels, the game will also have different control schemes for right-handed and left-handed players as well as a "classic" control scheme that doesn't use the touch screen. Scores will be available on online leaderboards, something the previous game lacked.

Secret Agent Clank

Publisher: Sony
In Stores: 2008

Announced at the Tokyo Game Show, *Secret Agent Clank* is a PSP-exclusive *Ratchet & Clank* game that takes place between *Size Matters* and *Tools of Destruction*, the upcoming R&C game for the PS3. Ratchet stands accused of crime he didn't commit, so it's up to Clank to save his friend. Clank does his best James Bond impression as Secret Agent Clank and gets abilities like Clank-Fu complete with tuxedo-related weapons (cuff link bombs, bow tie boomerangs, etc.). Now he'll have to combat plenty of ninjas and pull off capers worthy of 007 himself, like getting past lasers and employing secret agent devices like jet boots to rescue Ratchet.

Contra 4

Publisher: Konami
Available Now

DS

The earlier titles in Konami's *Contra* series were among the most kick-ass games in the arcades and on 8- and 16-bit game systems. Unfortunately, most of the people who worked on them left

Konami to form companies like Natsume and Treasure, and the series lost a lot of its magic when polygonal (3-D) games came into vogue during the PlayStation era. This new DS chapter will restore glory to the *Contra* name; just look at the lush 2-D scenery and sweet, sweet sprite art! Developer Wayforward Technologies (creator of *Shantae* and *Sigma Star Saga*) is adding new features that take advantage of the DS—like a grappling hook that lets you pull yourself up to the top screen—but their love and respect for the classic *Contra* games is apparent in every spread-gun bullet, every winged power-up and every screen-filling boss character.

CONTRA 4

God of War: Chains of Olympus

Publisher: Sony
In Stores: March

PSP

It's not too long before you'll be playing *God of War* again, this time on the PSP in a prequel to the series. (Gotta leave some space for *God of War 3*, right?) Kratos returns in a time before he became the Ghost of Sparta and as a champion of the gods, carrying out various missions for Mount Olympus. *Chains of Olympus* features new combat moves designed just for the PSP, all-new mythical creatures to battle and the same puzzle-solving exploration you know and love. The game plays surprisingly well without the use of two analog sticks and is being developed by Ready at Dawn, developer of *Daxter* for the PSP.

DO YOU KNOW THE SECRET OF THE

MYSTERY CODES?

Scattered throughout our *Tips* pages are cheat codes that we call "Mystery Codes"—these are codes that are known to work, but we're not sure what effect they have in the game in question. Please note that these codes may not have any effect at all; there's a very strong possibility that they were left in the games inadvertently or that their effects were intentionally disabled before the games were released. However, we invite you to prove otherwise. Test out these codes for yourself; you might be the first person (other than the game's programmer) to learn what a Mystery Code does!
